DESCRIPTION AND JUSTIFICATION OF PRODUCT CHANGE NOTE (PCN)			
<p>The TDC-GP30 development kits GP30-DEV-KIT and GP30-DEV-KIT kit are a combination of a reference board (no change here) and the PICOPROG interface board to a PC.</p> <p>The PICOPROG interface will be replaced by the new PicoProg Lite interface board. The reasons for this change are simplification, to overcome component shortage and to have a standard USB-C connector.</p> <p>There is no change in functionality of the reference board itself. PicoProg Lite does not support UART communication.</p>
